ATLANTA *FACES of* DESIGN*K KONG DESIGNS*

K Kong Designs is an Atlanta based, full service interior design firm that specializes in both residential and commercial projects. Inspired by architecture, form and function, K Kong Designs creates spaces that are inviting and engaging, while seamlessly blending a traditional, classic aesthetic, paired with a fresh mix of bold contemporary elements. We embrace color and use it in unexpected ways while carefully layering textures and patterns in a creative and elegant manner. The results are comfortable, chic, environments that exude glamour, boldness and sophistication. We look at each new project as an opportunity to inspire and reinvent ourselves, our work and to create a design aesthetic that is both unique and tailored to our clients' needs. Kong founded her firm in 2011 after establishing her career in commercial architecture. She is gaining momentum at a rapid pace having built a team of passionate and dedicated industry leaders including Bonnie Kersten and Raquel Conant. K Kong Designs is currently working on full service residential projects both in Atlanta and nationwide as well as a portfolio of commercial projects for clients such as Post Properties/MAA Communities and Berry College.
